

MailAct AI - Agentic AI Email Triage & Automated Action Workflow

From Emails to Actions — Instantly

Problem Context

Email overload drains productivity through repetitive reading, replying, and scheduling. Existing systems offer only passive filters; they fail to automate intelligent decision-making and execution.

Market Need

- **The Shift:** Moving from passive reading to active execution.
- **The Need:** Context-aware intent detection.
- **The Goal:** Reducing manual effort through automated task fulfillment.

Proposed Business Solution

MailAct AI introduces an Agentic AI-based approach that transforms emails into actionable workflows. Instead of requiring users to interpret and act manually, the system automatically prepares:

- Replies
- Tasks
- Calendar events

Users retain control through a review and approval mechanism, ensuring reliability and trust.

Value Proposition

MailAct AI delivers measurable business value by:

- Reducing email handling time significantly
- Automating repetitive workflows
- Improving decision-making speed
- Increasing overall productivity

Key Differentiation

Unlike traditional email clients, MailAct AI:

- Acts proactively instead of reactively
- Converts emails into actions automatically
- Uses human-in-the-loop approval for Accuracy

Target Users

- Corporate professionals
- Managers and executives
- Startup teams
- Customer support operations

System Architecture

- Frontend: React (UI Dashboard)
- Backend: Python, FastAPI (API handling)
- AI Layer: Gemini (processing & generation)
- Data Layer: Google Email Dataset

Business Impact (Analytics Perspective)

- Up to 70% reduction in time spent on email management
- Productivity improvement up to 80–85%
- Faster response and task completion rates

(Analytics Perspective)

Audience Segment	Primary Pain Point	MailAct AI Plain English Explanation
Founders & Execs	Decision fatigue & missed opportunities	Reads long threads; gives 5-min, 3-bullet debriefs.
Sales & Account Managers	High volume of repetitive follow-ups	Instantly drafts replies based on customer requests.
Project Managers	Fragmented data across different emails	Pulls dates & tasks out of text; does the typing for you.

Work of Process

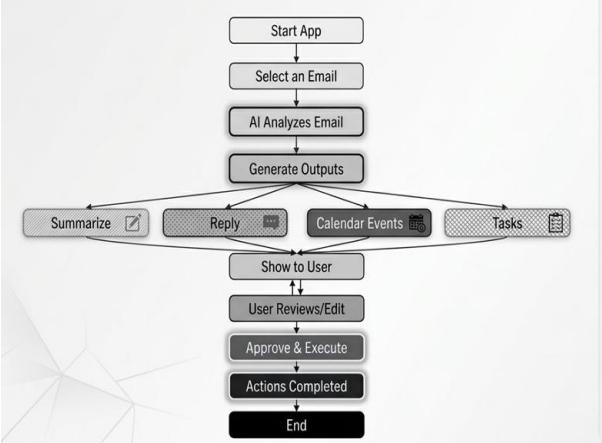

fig 1

Revenue Potential

MailAct AI can be scaled as a SaaS platform with:

Starter - (Freemium) Rps 0 / mo
Professional- Rps 19 / user / mo
Business/Team- Rps 49 / user / mo
Enterprise- Custom

Future Opportunities

- Personalized AI based on user behavior
- Multi-language and global deployment
- Expansion into enterprise workflow automation
- Voice-based interaction

Conclusion

MailAct AI transforms email handling into action-driven workflows, improving productivity and reducing manual effort.
